Universidad Mayor de San Andres - Facultad de Tecnología
Electrónica and Telecomunicaciones
2013 - 2018

COURSES

Udemy, Node: De cero a experto, React: De cero a experto
Platzi, Escuela de JavaScript
FreeCodeCamp

About me

After graduating with a bachelor's degree in electronics. I found myself working as a technician repairing laboratory artifacts which were not as exciting as I have desired. I was lacking in creativity and problem-solving. Soon after I heard about the Tech Industry and how challenging and rewarding it is and I've got delighted by it. I decided to take a leap of faith and made a switch in careers into tech ans keep learning and growing.
